MERCHANTS WITH CLEAR VISION

The stores are arteries of the nation's industrial life. They afford healthful "circulation" for the products of the shops and factories. Active business in our retail stores means active production at the nation's factories-earnings for the people, out of which they are able to support the Government in its war tasks.

The enterprising merehant here at home is helping to fight the battles of the free nations abroad.

He is carrying an essential part of the military burden-and upon him rests a share of the responsibility for the final issues of the great war. He is fighting in his way-and his part of the fight is not less important than that of the man at the front.

Wars are not won in a military sense unless they are first won in an economic way. A nation which is weak at home is important in battle. Our forces ubroad are dependent upon the quality and measure of support accorded to them by the people here at home.

Whatever weakens the nation industrially weakens it in a military way. In the great task of keeping the nation strong the merchant is a soldier on dufy on trial.

He must not strive for larger profits-but he must strive to render greater service. The large profits may come, inevitably. But the larger service must be given, irrespective of profits. It is the imperative dufy.

Keep business going full speed—and the Government can keep the great war machine at the highest efficiency.

When the great struggle has been won-as it will be in due time -the merchant who has carried his portion of the task without flinehing will be entitled to his due share of the glory of victory.

MONEY AND PRICES

Financial policies have had a tendency to increase the volume of money, and therefore to cheapen it. The financiers fix the price of potatoes and corn. It is not the farmers who do this. They may get some of the usufruet, but they do not themselves advance the price. The more money, the higher the price. As this increases, up goes the cost of living. This is the reason why so many things which we think should fall in price persist in their high rate. So it makes no difference how the rains come and go, how the hot days sorch or the cold days chill, the most of living does not descend, because there is plenty of money to keep the prices up. So we must not count upon any important reduction of prices until our financial policies provide for a diminished volume of entrency. We were much astonished that the price of peas, berries, tomatoes, etc., should keep up, but when we looked at the quantity of money affoat, we knew then that every pea, berry, beau, tomato must have its share of it, and that its share is maintained until it gets it.

COURTESY IN PUBLIC DUTY

A New York dispatch says that lack of courtesy on the part of railroad employes and some subordinate officials in their relations with the public was sharply rebuked in a memorandum issued by the regional director to railroud officers and employes in the Eastern territory. The director says the disposition of employes to slight the reasonable needs of the public was due doubtless to the feeling that competition had been climinated and there was no occasion for solicitude as to the public attitude. This is certainly a poor reason, for ignoring courtesy. That should control the conduct of all people who exercise any anthority in public affairs. The meanest discourtesy there is is that of a ticket ugent, conductor, motorman, or anybody occupying a public job. Courtesy is a virtue of itself, like honesty, and no one can show a lack of courtesy and be a true and faithful employe.

MAINTAIN VALUE OF OUR DOLLAR

One incidentally important thing for this country to do is to keep its money in good international condition, to keep the value of its dollar such that it will be worth in neutral countries what it ought to be and what it was before the war.

The surest way for any nation to do that is to produce more than it consumes. As Albert W. Atwood, financial expert, points out, this is especially true when war is eating up millions of dollars of wealth each year.

There are obviously two ways of going at that. Speed up production-and we're doing that just us fast as we can-and ent down consumption.

Will Kaltonbacher in the Louisville limes says:

While routine work incident to the campaign has actually begun at both the Democratic and Republican State headquarters in Louisville, neither party has completed its State campaign organization. The Republican State Central Committee has delegated the formation composed of J. H. Gillian, W. D. Cochran and John P. Haswell, the latter party nominee for Congress in the Fourth district. It is understood that the Republican campaign chairman will he named by the subcommittee early in the coming week, and the selection will be made by Dr. Ben L. In the opinion of the party leaders Senator James should have a very potent voice in the selection of the campaign chairman and the personnel of the committee that will direct the party fight, and the whole matter will be held in abeyance for the present or until his wishes are known.
